Carli Produzioni works at the highest professional level in the sector of design and realization of Exhibitions, Scenographies, Conferences, Stand, Infopoint, Roadshow and large-scale Events. Our work effectively communicates an idea and contributes to build an image of large public and private companies all around the world.

We provide for all our clients, furnishes, agencies and companies in every part of the world, who intend to organise or take part in an event in Italy or Europe.

Discover the convenience of seeing your projects realized without the burden of long and expensive transportation, with an established partner in this sector that resolves in real time every technical and organization problem.

Carli Produzioni has distinguished itself in the national landscape of stand furnishings for its work performance abroad, knowing how to manage issues regarding shipments, contacts with the fair organization and support services.

Today we are also the ideal partner for Stand agencies and companies on other continents.

SERVICES

CONVENTION

The experience and technique allow to create scenarios for company events of diverse corporate typologies and dimensions. We commit to provide creative and innovative solutions, continued updates of current trends and technologies, the knowledge of materials and work, the logistics organization, who make us the ideal partner for the realization and overall management of your corporate convention.

STAND

The stand has always been the basic service of our production. We create customized stands according to our customer's needs and budget. Display spaces made to order, where quality, communication and functionality are key to showcase at all fairs and events in Italy and abroad.

EXHIBITIONS

We provide all the elements in exhibitions, supporting and emphasizing the work and making it stand out in their uniqueness and beauty. We work with diverse materials, which we assemble to create a discrete but essential display, always combining graphic on any kind of material, thanks to the modern printing techniques we have with our partners, and technology, lighting and audiovisual.

LARGE-SCALE EVENTS

The setting-up of great events, institutional or corporate, is the situation where are able to make the most of it, because of its compatibility with the size of our company. We are able to maintain a high qualitative standard within the construction and assembly by always providing our customer with a qualified technical director, who will coordinate the professionals on site.

ITINERANT EVENTS

The open space is now a meeting place between the company and privates. We plan, implement and move structures dedicated to the promotion of trade or products and services. We provide any type of structure, from the large inflatable, to the container that can easily be transported to the info point for the commercial space.

SCENOGRAPHY

We imagine and realize television or fashion related events. Experiences made in some emerging foreign countries have allowed us to specialize in the production of large private events with astonishing scenarios.

TECHNICAL FURNITURE

Commercially, and exhibition are demonstrated and realized furnished where structure, materials and technology interact ensuring maximum functionality.

BUSINESS AREA

PROJECT MANAGEMENT

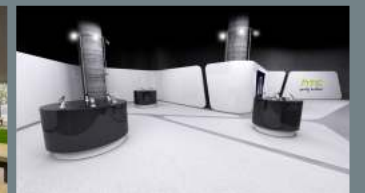

We respond promptly to customer needs to understand their goals and expectations by applying knowledge, attitude, tools and techniques to the activity of a project in order to achieve its objectives. The project manager is the first business contact to establish a relationship of trust and collaboration with the client, followed by the initial brief to the realization, right up to the post event. Its shape is aimed at the analysis, the design, planning and realization of the objectives of a project or event, managing all its features and evolutionary phase, respecting times, costs, goals and quality.

CUSTOMER SERVICE

We guarantee availability and services before, during and after an event, offering the sticker the serenity of always being followed and supported. The customer service guarantees constant organization and informational support in the management of the job: relationship with fair and location secretaries, bureaucratic practices with public bodies, logistics, shipments, business documentation and (gare) management.

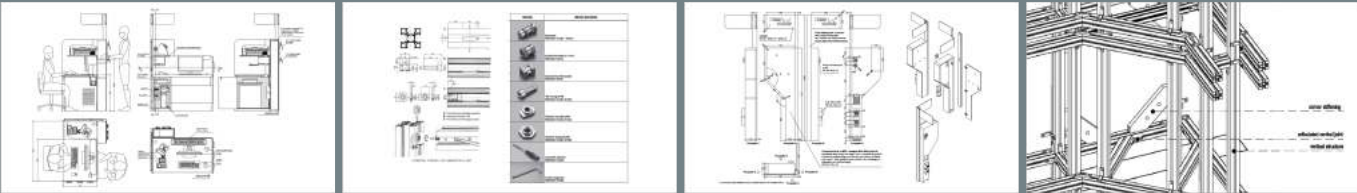

DESIGN AND GRAPHICS

We provide creativity and knowledge to achieve the set goals through and open and constant dialogue with the customer, who becomes an active part in the creative stage. The studio offers capacity and competence that can develop ad hoc solutions for the customer. Upgrades on trend material and styles, the introduction of innovative technologies and active systems, the “sartorial” approach to design are the base of our creative research. The graphics develop photorealistic 3D designs: a service that allows the customer to evaluate the yield of the final product and to make informed choices. It provides the visual of the real projection of the scenography or the stand, respecting the corporate image, and is continually updated on the printing systems and materials to provide innovative and attractive solutions.

TECHNICAL OFFICE

The engineering office engineers the designs of the design studio by elaborating the executive and necessities for production. The attentio to detail, the knowledge of materials and machinery, and the experience on the construction sites guarantee a quality result that is true to the customer’s expectations respecting the times and costs set. The computer skills of the technicians allow the processing of (business management CNC files). This services is also offered to external architects and clients who already have their own creative project.

PRODUCTION

We have the professionalism and all the equipment and installations necessary for the realization of any kind of stand equipment, from small info point to great scenography, always guaranteeing a high quality product. The production is distributed over a surface of 10,000 mq and is articulated in departments that allow the expected works for the realization of any kind of fair or scenographic equipment, as well as technical furnishings, often also produced as serials. The company provides training and updates to its employees, and applies absolute strictness on safety, ensuring that all employees work according to current accident prevention regulations.

ASSEMBLY AND ASSISTANCE

Reliability, knowledge of materials and equipment, familiarity of the numerous operations required in the design of complex structures, are the characteristics of our assembly teams formed by qualified personnel. The smelly of the stand and scenography are realized in our establishments are carried out by our assembly teams. The experience and competence of qualified personnel, prepared to operate in multiple situations, fairs, museums, theaters, TV studios, squares and shops, both in Italy and abroad, guarantee, in addition to respecting delivery times, the highest quality and precision. The support service is there to support the customer during the event, to manage unexpected circumstances and changes of scenery.

LOGISTICS

Transport is guaranteed everywhere thanks to fleet of vehicles that can move materials and personnel all over the country and abroad. We provide all means and handle specialized partners, for the transportation of equipment, often of remarkable volumetric entity. The office deals with the management of bureaucracy, travel and overnight stays of drivers and fitters, both nationally and internationally, even for intercontinental moves. We also provide drivers with the means to schedule daily deliveries or withdrawals. At out warehouses, large storage spaces allow for the (stands/displays) to be stored between one assembly and another.

SUPPORT SERVICES

Our network of collaborators and trusted partners allow us to offer to the most demanding customer a full “Keys in hand” service, including all the technical and organization aspects needed for a successful event. Over the years, we have created a network of professionals and companies that have become trusted partners, which whom we regularly collaborate to offer our customers a truly complete service:

- graphic and multimedia services
- supplies and design of audio-visual technical solutions
- engineers for calculations of complex structures
- hostess
- catering service
